Bad River - nutrient criteria question		03/18/2009 08:56 AM	

## Document Body

Hi Kathy,

As a follow-up question related to the periphyton discussion on yesterday's conference call, how important is periphyton collection and analysis for nutrient criteria development? I'm trying to make sure that we are collecting the data we need to develop nutrient criteria. We have collected some periphyton data in the past and are looking at doing it again.

Thanks for your help,  
Naomi
